LEON JAVALERA

Supply Chain & Logistics Coordinator | SAP S/4HANA | Python & Process Automation

Denver metro, CO | leonjavalera123@gmail.com
linkedin.com/in/leon-javalera-443679358 | github.com/leonjavalera123-ctrl
leonjavalera123-ctrl.github.io

Open to fully remote or Denver-metro hybrid roles

Professional Summary

Logistics coordinator with 9+ years across manufacturing and high-volume distribution who builds software tools for the work. Run a 300+ container inbound program in SAP S/4HANA at a wind-turbine plant: customs and import/export documentation, carrier and freight-forwarder coordination, and inventory accuracy. Outside the plant, build Python and web tools with AI-assisted development, including an interactive SAP inventory-control reference, an AWS S3 security auditor, and a security log analyzer, each with automated tests and documentation. Six Sigma Green Belt; SAP Certified Associate (C_TS452) in progress.

Core Skills

Supply Chain & Logistics: 300+ container inbound program | import/export documentation & customs | carrier and freight-forwarder coordination (DHL, FedEx, Maersk, LTL/FTL) | inbound scheduling to plant capacity | 3PL coordination

Systems & ERP: SAP S/4HANA (goods movements, SO/PO lookup and tracking, stock and movement-type troubleshooting) | WMS | warehouse robotics | Excel reporting

Technical: Python (pytest, boto3, FastAPI, regex) | Git & GitHub | AWS S3 & IAM fundamentals | SQL / SQLite | PowerShell | HTML, CSS, JavaScript | AI-assisted development (Claude Code) | local LLMs (Ollama)

Process & Compliance: Six Sigma Green Belt (DMAIC) | Kaizen | TWI | cycle counting & variance research | non-conforming material control | hazmat handling (trained)

Experience

Vestas | Brighton, CO — February 2024 - Present
Internal Logistics Member IIA

- Plan and manage a 300+ container inbound program (receipt, handling, and processing), keeping production lines supplied without carrying excess stock.
- Coordinate global shipments end to end: import/export documentation, customs regulations, freight forwarding, and carrier selection across DHL, FedEx, Maersk, and LTL/FTL partners.
- Use SAP S/4HANA daily to look up and confirm sales and purchase orders and record goods movements, improving order accuracy and inventory traceability.
- Work with buyers and supply chain teams to root-cause shortages, track shipments, and keep system status matching real-time reality.
- Maintain inventory accuracy through cycle counts and physical-to-system reconciliation; quarantine and disposition non-conforming material so defective parts never re-enter stock.
- Apply Six Sigma (Green Belt) and Kaizen to material-flow problems, then standardize and cross-train the corrected method using TWI.

Staples, Inc. | Brighton, CO — February 2022 - November 2023
Operations Supervisor

- Managed inventory for a high-volume fulfillment center handling up to $500,000 in product daily.
- Implemented improved inventory tracking practices that cut discrepancies by 12% and reduced stock loss by 2%.
- Led the Break Pack operation: about 4,500 parcel picks per day within a 10,000-parcel daily operation; forecasted workloads to plan staffing and reported on inventory and performance.
- Operated and troubleshot warehouse robotics supporting order picking. Completed ILeads, Staples' six-month leadership program.

Earlier roles

Checkers Safety Group | Tech II / Lead | Broomfield, CO 2021 - 2022
Amazon | Warehouse Associate / Lead | Thornton, CO 2019 - 2021
Rasco Janitorial Supply | Lead Driver / Warehouse | Denver, CO 2017 - 2019
Diamond Shamrock | Customer Service Associate | Denver, CO 2015 - 2017

Technical Projects

SAP S/4HANA Inventory Control Field Guide
JavaScript, HTML/CSS, Node.js | leonjavalera123-ctrl.github.io/projects/sap-field-guide.html

- Built an interactive reference for the inventory-control desk: a live MMBE stock simulator that posts goods movements and shows stock move between stock types, and a triage wizard that routes a symptom to the right t-code and correction.
- Added a companion knowledge base of 87 entries across 13 S/4HANA modules (procure-to-pay, order-to-cash, finance, MRP) with natural-language search that runs fully offline.

AWS S3 Security Auditor
Python, boto3, AWS IAM, moto, pytest | github.com/leonjavalera123-ctrl/s3-security-auditor

- Read-only CLI that audits every S3 bucket in an account for 9 misconfigurations (public policies and ACLs, Block Public Access, TLS, encryption, versioning, logging), modeling how settings override each other instead of checking each in isolation.
- Ships a least-privilege IAM policy (10 read-only actions) and 40 automated tests against a simulated AWS account, so it runs with no credentials.

SSH Log Analyzer
Python standard library, regex, pytest | github.com/leonjavalera123-ctrl/ssh-log-analyzer

- Parses Linux authentication logs and flags brute-force (sliding time window), password-spray, and success-after-failure break-in patterns, with text/JSON reports and script-friendly exit codes.
- Hardened the parser so attacker-chosen usernames can't misattribute an attack to another IP; 30 tests, including near-miss cases that guard against false alarms.

AI Email Triage Evaluation Toolkit
Python, SQLite, Ollama (local LLMs) | leonjavalera123-ctrl.github.io/projects/ai-email-triage.html

- Built the measurement step before the product: local mail import, stratified sampling, a hand-labelling UI, a held-out test split, and a bake-off for local language models.
- Scored models on miss rate for urgent mail rather than headline accuracy; a model that labels everything "routine" scores about 90% yet catches zero emergencies.

Certifications & Learning

SAP Certified Associate - Sourcing & Procurement (C_TS452) - In progress
Claude Code: Software Engineering with Generative AI - Coursera, in progress
AI Literacy - IBM SkillsBuild, October 2026
Artificial Intelligence Fundamentals - IBM SkillsBuild, October 2026
Craft Precise Prompts for AI Models - IBM SkillsBuild, September 2026
Six Sigma Green Belt - DMAIC, process mapping, root cause analysis, control plans
Kaizen / Continuous Improvement - Waste reduction and rapid improvement events
TWI (Training Within Industry) - Vestas; 40+ hours instructor-led
SAP S/4HANA Training - Vestas; order lookup, goods movements, inventory transactions
ILeads Leadership Development - Staples, Inc.; six-month program

Education

Front Range Community College | Westminster, CO | High School Equivalency Diploma
